PORTIONS TO STUDY :-

Digital Electronics :-

- Design logic gates using 2:1 MUX, 4:1 MUX, 16:1 MUX.

- Converters of first Question.

- Propagation Delay
Setup Time
Hold Time
Combinational delay.

- FSM - Mealy
- Moore.

- Modulus of a Counter (MOD-7, MOD-10)

000 } → which Counter?
111

- Blocking / Non-Blocking

- initial begin
fork join

- Analog Electronics → whatever I have taught.

- MOSFET operation - NMOS, PMOS
- CLM - Enhancement / Depletion
- Semiconductor Physics.

- $Y = \{(A+B).C\}.D+A$ → CMOS logic Realization.

K: Map Significance
1 VDD
2 VDD
5 variable
**
